INTRO!

As humans, we need to stay healthy by eating a healthy and balanced diet. However, nowadays many people neglect their health and are exposed to diseases like diabetes., seeking nutrition advice has become expensive. So we offer free food service and meals at symbolic prices and a low-cost application that provides instant nutrition advice. I decided to create

Instant chat with a specialist

Canva

This wireframe shows a mobile application interface. At the top, there are icons for a bell and a power button. Below that is a large circular progress bar indicating 1000 out of 2000 calories consumed on Day 8, dated Tuesday 10 January 2023. Underneath the progress bar is a section titled "Today's meals" with two tables for breakfast/lunch and dinner/snack. A button at the bottom allows users to "Instant chat with a specialist". At the very bottom is a navigation bar with icons for a delivery truck, a location pin, a user profile, and a house.

In the end

The goal is to have a program that meets all the nutritional needs of the user and that is feasible to use and easy to learn.

Thanks for
listening
